The A3 colour multifunctional systems promise to improve everyday office work – and they deliver on that promise. Whether copying, printing or scanning, the improved ease of use is evident even at the preparation stage. Additional scanning options, such as the dual scanner with ultrasonic sensor for multi-page detection, make for smoother work processes requiring less paper. A print resolution of up to 1,200 x 1,200 dpi ensures detailed, high-quality printouts. Versatile finishing options allow the user to create professional brochures and presentations. The 10.1 inch colour touch display with its slimmed-down buttons ensures clear and intuitive control over the multifunctional system. It's never been easier to get your work done. Guaranteed!

## HIGHLIGHTS:

**Goodbye to paper:** If you want to move towards a paperless way of life in your office, opt for a document feeder with an ultrasonic sensor for multi-feed detection. Original documents can be scanned and digitised at a rate of up to 220 images per minute, at 300 dpi in colour and black and white. Additionally, the integrated HyPAST™ interface makes it possible to use a range of different HyPAST™ applications, as well as to incorporate customer-specific software solutions that will make your work more sustainable and require less paper.

**Flexibility at its best:** Paper weights of 52 to 300 g/m<sup>2</sup> and formats ranging from A6R to SRA3 are processed from the paper cassette. Thanks to the space-saving internal finisher with capacity for 50 A4-sheet stapling and the 4,000-sheet finisher with 100-sheet stapling capacity, larger projects can be professionally stapled and hole punched\*. The final touch on finishing options is the brochure module\*. It allows for the creation of perfect brochures of up to 80 pages. To make all this possible, the system can hold up to 7,150 sheets.

**Play it safe:** Security in office communication is a challenge for any company. To help protect your data, our systems already fulfill important safety standards in basic configuration. This security solution protects your confidential information from the very beginning, at system level: it overwrites and encrypts copy, scan and print data even before it's saved to disk. In addition, the memory area for output data is automatically wiped clean.

**Mother Nature says thank you:** It's very important to us to use resources carefully. The systems therefore not only come with improved TEC values – they also avoid waste thanks to their longevity. The systems have been designed to meet future environmental and energy requirements. We're always thinking ahead.
