Outstanding performance even under major pressure.

Is maximum productivity combined with consistent quality and utmost flexibility your top goal? Then our 7057i and 8057i A3 b/w multifunctional systems are virtually made for you. The systems offer optimised performance, which is evident from the rapid output of the first page. At the same time, integrated OCR text recognition guarantees significantly improved efficiency. Scans can be transformed into new, editable and searchable files that can be stored in a pre-defined folder at just the touch of a button. And the best thing about that: only the scanned documents are searchable, but your confidential data on the system is not!

HIGHLIGHTS:

Sheer reliability: in order to make office workflows more efficient, the new systems feature a dual scanner as standard, which includes an ultrasonic sensor that prevents multiple originals from being fed in at the same time during scanning. Up to 270 originals can be scanned and digitised in one run at a rate of up to 220 images per minute in colour and b/w at 300 dpi.

Production line levels of efficiency: these systems offer the ideal set-up for carrying out large print jobs. The optimised output speed of the first copied or printed page is merely the beginning of the value-added chain. The systems can process a paper weights up to 300 g/m² from a maximum of eight different paper feeds in one printing process, maintaining a total paper capacity of 7,650 sheets. All this combined with the 4,000 sheet finisher*– not to mention the brochure modules* – gives rise to a professional, folded end product.

Integrated security: you can count on these systems when it comes to keeping your confidential data secure. Data to be copied, scanned and printed is protected by means of hard drive encryption. The Trusted Platform Module (TPM) offers additional support to this end. This security chip is integrated within the system. It saves and manages encryption codes generated on the device in the TPM's memory. Accessing the memory via external devices is – of course – impossible.

Operation is a breeze: the large 10.1 inch touch-sensitive colour display doesn't just look stylish – it will win you over with its intuitive operation and clear menu navigation. Additionally, the integrated HyPAS™ interface enables you to use a range of different HyPAS™ applications, as well as to incorporate customer-specific software solutions that will make your working day more sustainable and efficient now and in the long term.
