Corporate / Product Focus

Global renewable energy organisation opens offices in UK with UTAX A3 Colour multi-functional printers (MFPs)

New Office Installation

UTAX dealer, A1 Digital Solutions, used UTAX devices to win a deal with a new UK subsidiary of a global renewable energy supplier who specialise in energy solutions.

Working closely with A1 Digital Solutions, we established what they anticipated their printing requirements would encompass, and advised on the best device for their needs.

6 offices were set up across the UK with 9 UTAX 2508ci Colour A3 MFPs

These devices were chosen for their durability, reliability and diverse functionality. Each new office was provided with at least one of these devices to enable A3 colour printing, scanning and faxing.

CASE STUDY with RENEWABLE ENERGY ORGANISATION

International organisation opens multiple offices in the UK. See how UTAX devices were installed to ensure their new office printing needs were met securely and efficiently.

Why the 2508ci?

The 2508ci Colour A3 MFP is one of the most popular devices in the UTAX portfolio. With high resolution, high paper capacity and generous system memory, this device is durable, reliable and efficient.

With just one click and without a computer, you can scan to the cloud and print the saved documents from the HyPAS™-compatible multifunctional system. With a print speed of 25 A4 pages per minute for both colour and black and white printing, this model is ideal for businesses who need reliable colour printing.

UTAX were of great help to A1 Digital, supporting us in all aspects of the tender process, along with full assistance regarding delivery and installation to multiple UK sites. Additionally with the Direct Service offering provided to several sites, our customer is delighted with the proactive approach to maintenance levels.

SCOTT BUCHAN, A1 Digital Solutions

IF IT WORX, IT'S

The 2508ci enables you to easily scan or print documents and photos to or from your mobile device making it ideal for modern offices with a variety of technologies.

Features of the 2508ci and 3508ci

This is a durable and efficient A3 colour device where you can perform all your print, scan and fax needs. Various finishing options allow you to adapt the device for your specific business needs.

- ▶ Process different formats (A6R-SRA3) and paper weights (52–300 g/m²) and adapt your multifunctional system according to your processes and requirements.
- ▶ Finishing options range from space-saving internal 500-page finisher to a dual scanner with an ultrasonic sensor for high-speed digitalisation.

- ▶ The free-to-use My Panel application allows you to operate the multifunctional system using a mobile device or map alternative basic functions using voice activation.
- ▶ Verify your identity to the multifunctional system using a contactless card or transponder; or log-in with a smartphone using Bluetooth. Allocate email addresses to the contactless cards to immediately access your documents via email.
